## Cultural Implications of Information Governance in a Global Society

A white paper published by the 2-20 Family of Companies investigates some of the driving factors for implementing information governance (IG) programs around the world.

As laws and cultural attitudes towards recordkeeping vary by global regions, different approaches should be taken to ensure the successful adoption of information practices, but still arrive at the same end-result, the company says on its website.

Written by 2-20`s resident information governance expert Ilona N. Koti, the paper gives her insights on how to take on IG throughout the world.
