2020 Year of Compliance

The 2020 Year of Compliance is a unique monthly toolkit that focuses on how real companies make decisions around their risk and compliance programs in today's complex environment.

We are speaking directly to the industry professionals responsible for key elements in their compliance program to better understand their concerns and hear the changes they've implemented to deliver a more impactful program.

Each month, we will feature a new company and challenge, as well as provide additional resources to help drive your own success.
