

A State of the Utilities Industry Study – What Keeps You Awake at Night?

☒ Faced with everything from unpredictable weather to changing renewable energy portfolios to volatile fuel prices, utilities can only be certain about one thing: uncertainty.

Energy Central will present a complimentary webinar Thursday, Sept. 4, beginning at noon Eastern time on the state of the utilities industry.

Energy Central's Sierra Energy Group surveyed 70 utilities professionals in IT, finance, trading and risk management roles to better understand what keeps them awake at night.

Analyst Mike Smith of Sierra Energy Group and industry expert Corwin Moczygemba, Managing Director of Opportune's Process and Technology practice, will discuss the top trends, challenges and best practices in the utilities industry, including:

- Staying current with regulatory compliance
- How to improve trading and risk management processes to decrease costs and create efficiencies
- Insights on commodity price volatility, asset optimization and managing supply and demand
- Leveraging smart grid investments
- The convergence of utilities and natural gas

Register for the event.
