

Energy Webinar: Success Through Process Management

Aconex has posted a free webinar discussing the finer points of process management in energy industry projects.

The provider says participants will see IIR's outlook for the oil and gas industry, hear how Fluor manages key processes on complex projects, and get a brief look at how Aconex can put you in control.

Chris Perkins, Interface Manager at Fluor, discusses improving productivity and accountability on selected projects. Jared R. Rastegar, System Consultant with Aconex, discusses handling critical processes such as interface management and design reviews. And Jesus Davis, VP of Oil & Gas Research at IIR, gives an overview of market conditions and trends in the Oil & Gas sector worldwide.

Watch the on-demand webinar.
