

# Top Six Tools to Monitor Contract Performance

The American Management Association presents a free webinar webcast addressing the contract officer representative's role and a number of tools that can be used during performance of the contract to ensure a successful post-award phase of the acquisition process.

The contracting officer's representative (COR) is the principle representative of the contracting officer (CO) for post-award management of the contract, the association says on its website. There are a number of tools available to the COR to monitor contractor performance. These are six of the most effective tools to monitor contractor performance:

1. Contractor Progress Reports
2. Contractor Quality Assurance Plan (QAP)
3. Quality Assurance Surveillance Plan (QASP)
4. Earned Value Management (EVM)
5. Performance Assessment
6. Product or Service Inspection & Acceptance
