U.S. Exports to Mexico and the Growth of Cross-Border Demand

Argus has posted a free on-demand webinar discussing the outlook for Mexico's demand for energy exports from the United States.

Growing demand from Mexico continues to be a bright spot for the oversupplied U.S. gas market, Argus says on its website. Exports to Mexico have more than doubled since 2010 and should grow this year as new cross-border projects come on line.

This webinar discusses key U.S. pipeline projects targeting Mexico demand, the outlook for key US gas fields that will supply the country, and the sources of demand growth in Mexico and the country's historic energy reform.

Watch the on-demand webinar.
