

Baker Botts Launches Carbon Technology Arm of Energy Law Firm With Eye to International Clients

“Houston-based Baker Botts, one of the top energy law firms in the U.S., launched a dedicated carbon capture, utilization and storage practice group within its energy sector,” reports Erin Douglas in *Houston Chronicle’s Business Energy*.

“After launching a hydrogen practice group in June, Baker Botts launched the carbon arm, which the firm said has been a significant topic of interest from clients and energy markets, ‘even during the difficult COVID-19 working environment.’”

“Carbon capture, utilization and storage is considered a promising technology that could help to slow the pace of climate change, especially in the oil and gas industry.”
