

Bitfarms Signs Contracts and Commenced Construction of a 210-Megawatt Facility

“Bitfarms Ltd. A global Bitcoin mining company, signed engineering, procurement and construction (EPC) contracts and commenced construction of a production facility in Argentina. As previously announced in April 2021, the new facility is expected to add up to 210 megawatts MW of infrastructure capacity,” reports Yahoo finance in their blog.

“Our new high-production facility in Argentina, which is expected to accommodate over 55,000 miners upon completion, will greatly expand our capacity and global footprint. Combined with the expansion in Quebec, Canada and our planned build-out in Paraguay, we are positioned to achieve our corporate target of 8 exahash per second.”
