

Cybersecurity Predictions for 2016: Targeting the Human Factor

In 2016, people are the targets: from email and web to social media and mobile apps, attackers will build on the successes of 2015 by developing campaigns that , according to an on-demand webinar presented by BrightTALK.

In the **webinar**, Patrick Wheeler, director, Threat Security at Proofpoint, addresses the shift to increasingly targeted attacks on people behind the devices.

Participants can learn how to:

- Take measures to secure data
- Effectively track incidents and remediate incidents
- Report out on compliance status

Watch the on-demand webinar.
