

# Metaplanet Secures ¥2 Billion Loan to Expand Bitcoin Holdings

Tokyo, Japan – Japanese hotel developer and bitcoin treasury firm Metaplanet has announced plans to borrow ¥2 billion (\$13.5 million) to increase its bitcoin (BTC) holdings.

Metaplanet holds 2,888 BTC and has implemented a long-term acquisition strategy to accumulate 21,000 BTC by 2026. The firm claims it holds more bitcoin than any publicly traded Asian company.

Before adopting its bitcoin-focused investment strategy in 2024, Metaplanet experienced six consecutive years of financial losses. However, the company has since turned profitable, emerging as one of the best-performing equities in 2023.

CEO Simon Gerovich reaffirmed the company's commitment to increasing its BTC holdings, stating that Metaplanet will be "buying the dip."

This latest move underscores Metaplanet's confidence in Bitcoin as a long-term asset and reflects a growing trend of corporate investments in cryptocurrency.

## Bitcoin Surges 20% Following

# Inclusion in U.S. Strategic Reserve

On Monday, Bitcoin's value experienced a significant surge, increasing by over 20% from its previous lows. This rise follows U.S. President Donald Trump's announcement that Bitcoin and other cryptocurrencies will be included in a new U.S. strategic reserve. □

In a Sunday Truth Social post, President Trump stated that his January executive order on digital assets would establish a stockpile comprising Bitcoin, Ether, XRP, Solana, and Cardano. This marks the first public disclosure of the specific cryptocurrencies to be included. Trump emphasized that Bitcoin and Ether would be central to this reserve. □

The announcement led to a notable market reaction. Bitcoin rose from \$78,273 on Friday to approximately \$94,154 on Monday. □ Ether increased by 20% over the weekend, reaching \$2,482. □ XRP surged by 38%. □ Solana climbed to 20% and Cardano jumped 78%.

Chris Weston, head of research at Australian online broker Pepperstone, commented that Trump's disclosure provided a positive shock to the crypto market, offering a much-needed catalyst to counter recent bearish trends.

However, some analysts urge caution. Tony Sycamore, a market analyst at IG, noted that while the announcement has boosted prices, concerns remain about the funding sources for cryptocurrency purchases. The bullish impact might be limited if the reserve is funded through seized cryptocurrencies rather than new market purchases. □

This development has reinvigorated a market experiencing declines due to unmet expectations regarding regulatory changes. The upcoming White House Crypto Summit, scheduled for

Friday, is anticipated to influence market sentiment further.

# Elon Musk Proposes \$5,000 'DOGE Dividend' Checks for Taxpayers

Billionaire entrepreneur Elon Musk has suggested distributing "DOGE dividend" checks to American taxpayers, aiming to return 20% of the savings achieved by the Department of Government Efficiency (DOGE) back to the public. Initially put forward by Azoria CEO James Fishback, this proposal could provide approximately \$5,000 to each of the 78 million households that pay federal income taxes, contingent upon Musk's ambitious goal of reducing government spending by \$2 trillion.

Politico

However, implementing such a rebate program would require congressional approval, and budget experts caution that lawmakers might prefer to allocate the funds toward reducing the national debt or extending existing tax provisions. Additionally, the legality of DOGE is currently under judicial review, adding another layer of complexity to the proposal.

Politico

Musk, who President Donald Trump appointed to co-lead the Department of Government Efficiency alongside Vivek Ramaswamy, aims to streamline federal operations and cut wasteful expenditures. The department, operating outside the formal government structure, seeks to achieve significant structural reforms by July 4, 2026.

Reuters

While the idea of government-issued checks is not new—similar stimulus payments were distributed during Trump's first term—the feasibility of funding such rebates through anticipated government savings remains uncertain. The proposal's success hinges on achieving the projected \$2 trillion savings and obtaining the necessary legislative approvals.
