Changing the Way Energy Is Produced, Transferred, and Consumed

As a part of its Digital Energy Technology Webcast Series, National Instruments has posted a complimentary webinar on what's wrong with the embedded systems design process for the smart grid.

On its website, the company says the webinar shows how NI R&D teams are eliminating the most important bottlenecks in the development process. It also shows how to apply new tools and technologies from NI to tackle these challenges head on.

Presenters are Owen Golden—Vice President, Global Energy Segment, NI; Brian MacCleery—Principal Product Manager for Clean Energy, NI; and Dr. James Truchard—President, CEO, and Cofounder, NI.

Watch the webinar.
