

How to Calculate the Cost of a Data Breach

Clearwater Compliance will present a complimentary webinar featuring industry experts discussing how to assess specific security risks and build a strong business case for enhanced security.

The webinar, titled “How to Calculate the Cost of a Data Breach and How to Get the Budget for Your HIPAA-HITECH Compliance Program,” will be Dec. 3, 2015, from 11 a.m. to 12:15 Central time.

“Even with the increased enforcement of HIPAA and HITECH requirements and the increase in penalties being levied for non-compliance, the security efforts of health care organizations responsible for safeguarding protected health information (PHI) are simply not keeping pace with the growing risks of unauthorized or impermissible disclosures of PHI,” the company says on its website. “Those risks are increasing as a result of the expansion in the number of organizations handling PHI and thus statutorily-obligated to comply with HIPAA, the increase in electronic health record (EHR) adoption and the growing rewards of PHI theft.”

Register for the webinar.
