Implementing Contract Management Software – Best Practices

CobbleStone Systems has published a white paper designed to help companies implement new contract management software, beginning with preparation and continuing through the complete process.

One of the key steps, the paper explains, is getting key stakeholders on board with the process. Implementation will require a plan and participants will have to stick to it.

More guidelines include mapping out the process, starting out simple, and dedicating the time required for the process without rushing.

Download the white paper.
