

Compliance Map Enterprise: A Webinar Demonstration

✖ The Compliance Map will host a free webinar covering a demo of its enterprise software solution for the management of environmental compliance regulations, directives and product stewardship. The event will be Thursday, Sept. 4, from 10 am. to 11 a.m. PDT.

The presentation will cover how Compliance Map manages regulatory obligations arising from environmental compliance directives.

Other topics will include:

- Maintaining and building remittance reports for Extended Producer Responsibility Directives such as WEEE, Packaging, Battery, Beverage & Oil
- Conflict Minerals smelter & supplier management and reporting mechanisms using the EICC GeSI format
- Data collection management and report distribution using the Compliance Map supply chain management tools to facilitate data gathering as well as automatically responding to customer enquiries
- BOM tools to roll-up compliance verdicts such as RoHS, REACH SVHCs, Phthalates, EMC, MDD and aid in gap analysis and integration with ERP & PLM systems such as SAP, Agile, PTC, etc...
- Compliance & corporate governance including project and process management

Register for the complimentary webinar.
