HIPAA Compliance as a Service

Compliancy Group will present a complimentary webinar designed to help participants and their clients be compliant with healthcare regulations. The event will be Tuesday, August 18, at 2 p.m. Eastern time.

“According to HHS, 70 percent of the market is not HIPAA compliant, while CMS states that 79 percent of Meaningful Use Audits result in failure.” Compliancy Group says on its website. “The two biggest factors: incomplete risk assessments and the lack of understanding between the difference of HIPAA and HITECH compliance. With massive breaches, like Anthem, and mandatory 5% Meaningful Use Audits, Covered Entities are looking to their MSPs to provide a solution.”

The webinar will cover:

- Be confident about compliance
- Increase profits
- Retain clients
- Acquire new clients

Register for the webinar.
