HIPAA Compliance Tune-up for 2016

The **Compliancy Group** will present a **free webinar** focused on mitigation strategies Covered Entities and BA's alike can take to minimize the risk of data breach or actions prompting an OCR Audit. The webinar will be Wednesday, March 9, beginning at 2 p.m. EST.

Healthcare IT thought leadership and practice managers continually seek ways to foster a culture of alertness when it comes to HIPAA compliance, the company said in a release. They have the dual challenge of staying on the right side of federal regulators and stopping would-be hackers. This is especially true given the potential impact a data breach can have on their organization's reputation and bottom line. By reflecting on 2015, it becomes clear that covered entities and business associates alike will continue to prepare to mitigate the threat of cyber-attacks and the planned ramp up of OCR Phase 2 Audits.

The webinar will cover:

- Security risks that might initiate an OCR Audit or increase risk of data breach
- Why you should prioritize a Security Risk Analysis
- 6 Cyber Hacking prevention tips
- How to create a culture of a Cyber Security workforce
- What is TLS vs. SSL encryption and why you should care

Register for the webinar.
