

Cyber Revolution Named a Premium Solution Provider to ABA Law Practice Division

Cyber Revolution, Inc., a provider of solutions designed for small and medium sized law firms, has announced that it has been selected as a Premium Solution Provider to the ABA Law Practice Division.

“Cyber threats are constantly evolving to overcome security barriers, but our affordable Cyber Security monthly plan provides the protection that small and medium sized law firms need to stay ahead of current and future cyber threats. Being proactive is the only option for law firms to protect themselves,” said Nicolas Chaillan, CISO of Cyber Revolution, Inc.

In a release, the company said:

Cyber Revolution’s Serenity Plan provides an affordable and simple cyber security solution for law firms. Led by Cyber Revolution’s team of world-renowned experts, the Serenity Plan includes a yearly audit, employee trainings, risk assessments, 24/7 emergency support and Cyber Revolution’s proprietary Law Firm Cyber Security Certification program.

“Cyber Revolution’s Certification Seal can be used to assure current and prospective clients, regulators and insurance providers that your firm has taken the necessary steps to implement effective and secure procedures and processes that will limit exposure and protect their license, reputation and clients’ data”, Chaillan added.

Cyber Revolution hopes that with its relationship with the ABA, it can spread awareness of cyber security in the legal field through educational outreach, trade shows, professional

publications and the ABA's extensive network. Moreover, Cyber Revolution hopes to empower small to medium sized law firms that traditionally find themselves either too small or resource constrained to proactively take control of their digital security.

"This is the solution that everyone was waiting for. Cyber Security protections used to be too expensive and scary for small law firms like us. Cyber-Revolution's Threat Brief and Report was thorough and insightful – exposing vulnerabilities not only to my systems but all aspects of my firm that could result in the unintended disclosure of critical information. Their level 3 certification will soon be the standard by which all lawyers will have to safeguard information," said David J. Dischley, of the Law Office of David J. Dischley, PLC.

About **Cyber Revolution, Inc.**

Cyber Revolution has more than 15 years of experience in the Cyber Security industry, with leadership from Founder and Chief Information Security Officer, Nicolas Chaillan. Chaillan was an early pioneer and contributor to the computer language PHP. Chaillan developed two secure payment solutions for French banks and is considered a top industry expert in Cyber Security, the company said in a release.
