

Energy System Threats, Vulnerabilities and Risks: Identifying Highest Priorities

☒ Energy Central will present a complimentary webinar on vulnerabilities and risks that can threaten an energy system's security plan.

The webinar will be Thursday, Oct. 9, beginning at noon Eastern time.

Energy Central says the webinar will address such questions as: What are the components of a threat, vulnerability, and risk assessment? How do threats, vulnerabilities, and risks drive my security plan? What are common threats to the energy sector? What cybersecurity considerations can I incorporate with CIP 014? What law enforcement policies, standards, and doctrines can I leverage?

Energy Central provides a broad base of information products – news, directories, events, databases, books, periodicals, reports – all focused on the energy industry and available online.

Register for the webinar.
