

Webinar: Gaining User Adoption for Your IT Application Rollout

Epiance Software will present a webinar April 14 to show how hundreds of companies, including HP, Accenture, Samsung, RBS, CapGemini and many more, use Epiplex500 for a range of transformation initiatives such as ERP rollouts and upgrades, knowledge transfer during BPO transitioning stages, documentation of process best practices and certification of user competency levels prior to go-live stage for key business transformations.

The 60-minute webinar will be Tuesday, April 14, beginning at 10 a.m. Central time.

Participants in the webinar will :

1. See how dramatic savings in time and costs can be achieved by using Epiplex to develop and deliver content for learning and knowledge transfer for your application rollouts and upgrades.
2. Learn how change management efforts can be made significantly less expensive and time consuming.
3. Learn how user competency levels can be dramatically increased through multiple mode interactions with simulations of your new business application platform.
4. See how you can automate the process of certifying user competency levels by tracking user interaction with simulations and other learning content.
5. Learn how you can gain 80% + savings in time and cost in all your documentation creation efforts.
6. Learn how electronic performance support – contextual, just-in-time support can significantly improve user performance in executing business processes and cut down on

help desk costs
