Five Most Popular E-Signature Resources

eSignLive by Vasco has compiled a collection of its **five most popular white papers** on the subject of using e-signatures in business and law.

The papers include:

Beginner's Guide to Electronic Signatures: A comprehensive 38-page beginner's guide to electronic signatures introduces key concepts and considerations when creating digital business processes with this technology.

Why ESIGN is Not Enough to Keep You Out of Court: To help secure the enforceability of your electronically signed contracts and agreements, this article presents recommendations from three legal experts.

Electronic Signature Security: This whitepaper presents a holistic view of security to help identify the requirements against which you should evaluate e-signature solutions.

Key Evaluation Criteria for E-Signature Software: In this report, analyst firm Technology Evaluation Centers (TEC) outlines six key e-signature selection criteria and their importance to the success of a digitization strategy.

G2 Crowd's Electronic Signature Software Rankings: In their winter 2016 e-Signature Grid, business software review site G2 Crowd analyzed over 1,900 e-signature reviews written by business professionals.
