

Everlaw Announces New E-Discovery Platform Feature

Legal technology company Everlaw announced that it has released functionality that it said expands Everlaw's post-review toolset, helping lawyers move seamlessly from reviewing documents to building their case from e-discovery to litigation.

The new StoryBuilder Chronology will allow lawyers curate key documents to organize the most important documents identified in review, so legal teams can spot patterns, identify gaps, and develop the most compelling narratives for their case. By doing it during review, they can save valuable time, the company said.
