Exploring the Role of Natural Gas in U.S. Trucking

The University of California at Davis Policy Institute for Energy, Environment, and the Economy has posted a complimentary webinar on role of natural gas on trucking in the United States, presenting new research by the UC Davis Institute of Transportation Studies.

Presenters are Amy Myers Jaffe and Rosa Dominguez-Faus.

Discussion focuses on the feasibility that natural gas could be utilized to provide fuel cost savings, geographic supply diversity and environmental benefits for the U.S. heavy-duty trucking sector and explore whether natural gas can enable a transition to lower carbon transport fuels. The webinar includes a presentation and opportunity to ask questions.

Watch the on-demand webinar.
