Five U.S. Alternative Fuel and Advanced Vehicle Trends to Watch

ICF International presents a webinar discussing the post–American Recovery and Reinvestment Act (ARRA) outlook for the alternative fuel vehicles (AFV) industry and shares new trends related to plug-in electric, biofuel, natural gas, propane, and hydrogen-fueled vehicles.

ICF's alternative fuels team discusses the top five AFV trends:

1. Demand in the medium- and heavy-duty sectors for natural gas and propane vehicles
2. Strong growth in plug-in electric vehicles supported by state and utility incentives
3. Innovation and growth in biofuels resulting from compliance markets
4. Increased awareness and adoption of third-party leasing and ownership models for alternative fueling infrastructure
5. New approaches for fleet management
