

DLA Piper Litigation Practice Recognized By BTI Consulting

DLA Piper has been recognized as a “powerhouse” law firm for class actions and complex commercial litigation by BTI Consulting Group in its recently published BTI Litigation Outlook 2018 report.

The firm was also named a “standout” in IP litigation, securities and finance litigation, complex employment litigation, everyday employment litigation, product liability litigation and everyday commercial litigation. DLA Piper was one of eight firms to be recognized as a “BTI Awesome Opponent,” a category that includes firms clients said they least hope to see on the other side of the table.

The annual report draws on more than 4,800 interviews with corporate counsel and other leading legal decision makers conducted over the past 18 years to recognize law firms that are leading the litigation market by providing clients with faster turnaround times and more innovative approaches. Special analysis for this year’s report was based on feedback received between February and July 2017.
