Redgrave LLP Adds Adam Cohen

- Adam I. Cohen has joined Redgrave LLP as a partner in New York.

In a release, the firm said Cohen is certified as an Information Systems Security Professional (CISSP), a Cloud Security Professional (CCSP), and an Ethical Hacker (CEH). He works with cybersecurity, digital forensics and eDiscovery, data privacy, information governance, and records management.

“We are thrilled to have Adam on our team at Redgrave,” said Victoria Redgrave, chair, Executive Committee. “Our clients can expect valuable guidance from Adam, who will be advising companies on information security program compliance and investigating cybersecurity compromises that threaten privacy or intellectual property value.”

Jonathan Redgrave, managing partner, added, “Adam is a recognized leader whose exceptional background combines his work as a cybersecurity advisor, where he consulted on critical technology issues, along with many years spent as a top litigator. A great addition to our firm, Adam will cover the full spectrum of disciplines that intertwine governance, compliance, security, and privacy.”

Cohen said, “I am excited about joining Redgrave and contributing to the successes of the firm’s clients in meeting challenges where law and technology intersect and where Redgrave has always focused. My hybrid background in technology and law is perfectly suited to this focus and these challenges.”

Cohen received his J.D. from Duke University School of Law and his Bachelor of Arts from Wesleyan University.
