Litigating Climate Change: An Overview of Suits Against the Oil and Gas Industry

The Institute for Energy Law will present a webinar discussing the various climate change-based lawsuits and current trends in climate change litigation.

The event will be Wednesday, Oct. 18, 2017, at 1 p.m. EDT / 10 a.m. PDT. Information about MCLE credit and fees can be found on the **registration site**.

The institute is a part of the **Center for American and International Law**.

"Over the past few years, government entities and non-governmental organizations have moved the debate over climate change from the court of public opinion and into the courtroom," according to the institute. "Oil and gas companies have been one of the bigger targets for such suits, where plaintiffs have alleged that the companies are responsible for rising sea levels and that they have failed to warn about the potential impacts of greenhouse gas emissions."

Register for the event.
