

Webinar: eDiscovery Challenges of Enterprise Collaboration

Hanzo, a developer of contextual collection and dynamic web content software, and **Zapproved**, an ediscovery software provider for managing corporate litigation readiness, announced the lineup of industry experts for an upcoming **live webinar**, “Emojis and the Law: The Real-world eDiscovery Challenges Posed by Enterprise Collaboration.”

The event will be on Oct. 31, 2019, at 2 pm ET. This free web event will include a discussion surrounding modern enterprise collaboration platforms, the increasing trend in casual and emoji-filled communications, the challenges that these communications pose from a legal perspective, and how corporate legal teams can mitigate risk.

The panel of industry experts will discuss the challenges of managing data risk with modern communications within corporate collaboration applications.

The speakers will:

- Explore communication trends and tools affecting the enterprise
- Delve into the phenomenon of emojis, case law, and share some surprising facts that legal teams need to know to conduct eDiscovery better
- Share best practices for enterprise collaboration data management and governance policies
- Discuss the importance of applying best practices in preserving and collecting enterprise collaboration data

Speakers

- Eric Goldman, Professor of Law, Santa Clara University

- Ashley Fischer, Managing Counsel, H-E-B
- Ryan Zilm, Information Lifecycle Management Advisor, USAA
- Brad Harris, Distinguished Fellow, eDiscovery, Zapproved
- Evan Gumz, Senior Account Executive, eDiscovery, Hanzo
