

Defining Workstreams in Outsourcing and Managed Services Contracts

Transition

A post on the **Tech & Sourcing** blog of Morgan Lewis provides a checklist of common workstreams to consider in outsourcing and managed services transactions.

Authors **Barbara Murphy Melby** and **Kevin P. Dermody** discuss governance, planning, people and asset transfers, resource mobilization, operations, processes and documentation, infrastructure and security enablement, networks, change and communications management, and third-party contracts disposition management.
