Key Trends in the Global Power and Energy Market

A free on-demand webinar posted by Frost & Sullivan highlights the key trends and challenges faced by the world energy sector in the coming years.

On its website, the firm says shale gas has shaken up the U.S. energy market and the impacts continue to ripple into other regions. The growth of renewables and localized generation has further impacted European markets, causing major headaches for incumbent utilities and regulators. In APAC, utilities continue to try to meet increased demand.

The firm says participants in the webinar will learn about the latest developments in the global power and energy market, discover implications for the future, and find out if there are trends that could affect your business.

Watch the on-demand webinar.
