Government Contract Closeouts Best Practices

Aronson will present a complimentary webinar providing tips, guidance and best practices to help government contractors efficiently close out their cost type contracts.

The webinar will be Wednesday, Dec. 10, at 11 a.m. Eastern time.

Due to the government's legendary incurred cost audit backlog, many government contractors have never experienced a contract closeout, Aronson says on its website. As a result of DCAA's recent emphasis on completing incurred cost audits, contractors are starting to receive their final indirect rate letters and preparing for closeout.

Contract experts Tom Marcinko and Donna Dominguez will address:

- Incurred Cost Submission/Final Rates
- Closing Out Subcontracts
- Final Invoices
    - Fee Retainage
    - Indirect Rate Variances
- Closeout Forms and Certifications
- Quick Close Outs

Register for the webinar.
