Distributed Energy Resources: Seizing Opportunities While Managing Grid Impacts

Greentech Media will present a **complimentary webinar** on how distributed energy resources can be coordinate with centralized generation, in economically sustainable ways, to drive savings and enhance efficiency – to the mutual benefit of all entities involved.

The complimentary 60-minute webinar will be Thursday, Sept. 29, at 2 p.m. EDT. ABB will host the event.

Presenters will review the findings of a recent Greentech Media whitepaper that uncovers how distributed energy resources offer substantial opportunities to help shift utilities toward a more sustainable and resilient energy system, yielding significant economic and environmental benefits for utilities and renewable project developers.

Register for the webinar.
