

Hanzo Webinar: Manage The Vast Volumes Of Dynamic Slack Content For Discovery With Ease

Enterprises who've adopted Slack know the content adds up quickly across channels, direct messages, and group communications. Information governance is critical for mitigating risk. However, making informed decisions about preservation and scoping discovery is also essential for controlling downstream costs while meeting your duty to preserve.

In this session, Brad Harris, Hanzo's VP of Product, will share insights about how to effectively manage the sheer volume of Slack data for discovery. Additionally, attendees can see a high-level demo of how Hanzo Hold can help streamline Slack data discovery.

Speaker

Brad Harris, VP of Product, Hanzo

Brad Harris is the VP of Product at Hanzo, a pioneer in the contextual capture, and preservation of dynamic web and collaboration content for corporate legal and compliance departments. He leads product vision and innovation for the company. Brad has more than 30 years' experience in the high technology and enterprise software sectors, including assisting Fortune 1000 companies to enhance their e-discovery preparedness through technology and process improvement. Brad is a frequent author and speaker on data preservation and e-discovery issues and is a member of The Sedona Conference WG1 and WG6.
