

Harrity Patent Analytics Releases 2019 Top Patent Firms List

Harrity Patent Analytics has published its annual list of top patent law firms. The “2019 Top Patent Firms” list ranks industry leading patent law firms based on the total number of U.S. utility patents issued in 2019. The 2019 Top Patent Firms list comes with some significant changes from years prior, including an interactive dashboard and exclusive metrics.

“We have collected and analyzed data on more than 300,000 patents obtained by over 3000 different law firms, which we have turned into an interactive online dashboard that allows users to filter data by firm, technology area, and USPTO technology center. This gives both patent law firms and Patent 300 companies a better understanding of who is obtaining the most patents in the U.S.,” explains Rocky Berndsen, head of patent analytics at Harrity. “We are also offering premium analytics that delve deeper into detailed patent prosecution metrics, giving law firms and Patent 300™ companies more insights into the robust analytics of specific law firms.”

The Top Patent Firms dashboard includes patent firms that have obtained at least 50 U.S. utility patents where the patent firms are listed on the front of the utility patents. Company legal departments have not been eliminated from the list. The full list is available at <https://harrityllp.com/services/patent-analytics/top-patent-firms-2019/>.
