

Information Governance for SharePoint and Office 365

✖ A recent survey showed that only 10% of organizations have a workable Information Governance policy. Is your company one of them?

Concept Searching will present a complimentary webinar on Information Governance on Tuesday, August 19, at 11:30 a.m. Central time.

The webinar is designed to help participants understand the business challenges, the justification and ROI, and the technology issues that need to be answered, even if you are approaching Information Governance a step at a time. Understand, from a best practices perspective, how to develop a framework for Information Governance that can be accomplished incrementally.

The webinar will cover:

- What is Information Governance and why do you care?
- The business issues and application challenges
- Justifying Information Governance, ROI and savings, and building the case
- Developing a framework for Information Governance
- Technologies
- Information Governance for Office 365 – the unique issues
- Case studies in SharePoint and Office 365 – challenges and solutions

Focusing on the SharePoint and Office 365 environments, this webinar would also be beneficial to any organization, regardless of platform.

Who should attend: Business owners in Records Management, Legal, Data Security, HR, Migration, Compliance, Social Networking, and CRM, as well as Content Managers, SharePoint

Administrators, Architects, and Knowledge Managers.

Register for the webinar.
