

Intellectual Property in the Metaverse and the Challenges of Regulating a Lawless Frontier

“Intellectual property may be among the most important assets in online 3D virtual worlds such as Meta’s metaverse, but guarding those assets will likely invite a flurry of complex, new legal challenges,” reports Matthew Cutler & Mark Spinelli in JD Supra.

“The proponents of “Web 3.0” have lofty goals to create a collaborative space that comprises a seamless experience across the virtual world(s) designed by developers and companies. These virtual worlds come with their own complex economy involving digital assets—both virtual and tangible—and each grounded heavily in decentralized finance.”
