

Ipro Announces Launch of Automated Digital Discovery

Ipro Tech, LLC, a provider of eDiscovery software, has announced the release of its new automated workflow platform, Automated Digital Discovery (ADD®), designed to unify and simplify the eDiscovery process.

ADD was showcased this week at ILTACON in Las Vegas.

In a release, Ipro Tech said the ADD platform's patent-pending technology automates key data management and production steps; avoiding common time delays, errors, and budget overruns. "Once the workflow and settings are configured for a case, all you will need to do is 'add' more data," the release said.
