IPRO Partners with Complete Discovery Source to Bring Advanced eDiscovery Technology to the CDS Federal Cloud

Government agencies can now access IPRO's Live EDA and AI analytics via CDS's FedRAMP-Certified Cloud Environment.

May 10, 2021—TEMPE, AZ—IPRO today announced a partnership with Complete Discovery Source (CDS) to offer IPRO's eDiscovery Enterprise solution to U.S. government agencies through CDS's FedRAMP-certified Federal Cloud Services (FCS) platform.

The Federal Risk and Authorization Management Program (FedRAMP) establishes rigorous security standards for cloud services providers to the U.S. government. FedRAMP-certified since 2018, CDS provides eDiscovery services and solutions including leading-edge technology, advanced analytics, and secure scalable infrastructure to federal and state government agencies across the United States.

The CDS Federal Cloud supports the full suite of IPRO eDiscovery Enterprise capabilities, including Live EDA and AI Active Learning, that allow agencies to think more upstream and significantly reduce the amount of time spent on document collection and review.
