

Learn How Enterprise CLM Helps Maximize the Strategic Value of Contracts

Selectica presents a free on-demand webinar on the management of Contract Lifecycle Management (CLM) systems.

Too many departments operate in silos with separate CLM systems, Selectica says on its website. Contracts and the valuable data they contain are often locked away in formats that are difficult to integrate into sell-side or buy-side transaction systems, which require retrieval of critical information.

An Enterprise CLM (ECLM) approach gives you greater access, visibility and control to achieve cost savings, workflow efficiencies, increased compliance, reduced risk and more.

Watch the on-demand webinar.
