LegalSifter Announces New AI-Powered Contract Review Software

LegalSifter, based in Pittsburgh, has launched LegalSifter ReviewPro™, a new AI-powered solution designed to make contract reviews faster and more accurate. This tool builds on the company's AI technology, which has improved contract management since 2014. ReviewPro helps businesses by automatically flagging risks and applying redlines based on their specific legal standards. This tech will significantly speeding up the contract review process and giving consistency.

Eric Hall, CEO of LegalSifter, explained, "ReviewPro is build to assist legal and business teams review contracts efficiently while keeping in line with their company's legal requirements." The tool offers customized playbooks, reducing review times, cutting costs, and maintaining uniformity across all agreements.

Lars Mahler, Chief Science Officer, added that ReviewPro's AI engine uses advanced machine learning and natural language processing (NLP) to flag issues and generative AI to apply redlines. This combination ensures highly accurate results, giving users confidence without overlooking details.

Key features of ReviewPro include:

- Quick first-pass contract reviews with flagged risks, guidance, and auto-applied redlines in Microsoft Word.
- Contract-specific AI developed over 10 years, ensuring precise analysis of legal documents.
- Easy-to-use playbook management, allowing customization to suit specific legal and business needs.

To see how ReviewPro works, visit legalsifter.com/products/ai-contract-review and sign up for a free trial when available.

LegalSifter, founded in 2013, combines AI with contract expertise to improve businesses’ contract management, reduce costs, and increase efficiency. Visit www.legalsifter.com for more details.
