

M&A: Oil & Gas Activity in Review and Prospects for the Future

Crude oil prices have fallen to four-year lows, potentially impacting the North American energy renaissance. But how did this low-price environment impact merger and acquisition (M&A) activity for oil and gas companies in 2014, and what will low oil and gas prices in 2015 mean for the future?

Deloitte presents a free on-demand webinar discussing:

- M&A deals by subsector, including upstream, midstream, downstream, and oilfield services, domestically and globally.
- Key issues and risks that buyers focus on when considering transactions.
- Insights into what recent deals reveal about future M&A activity in the oil and gas sector.

Watch the on-demand webinar.
