

Managing Partial State of Charge in Microgrids

✖ HOMER Energy joins market partner Trojan Battery Company for an online educational presentation, followed by a live question and answer session on ways microgrid integrators and operators can develop top-performing systems using HOMER simulations and Trojan industrial batteries with Smart Carbon™ technology.

The event is scheduled for Tuesday, Sept. 2, beginning at 11 a.m. Central time.

The presentation will include a live demonstration on how HOMER users can optimize microgrid designs using HOMER and Trojan Industrial batteries, specifically designed to address the impact of PSOC on cycling batteries in solar microgrid applications.

Register for the online event.
