# Managing Risks in Large Solar Energy Projects: Webinar

Principal Energy Institute has posted a free on-demand webinar designed to help energy project developers, operators and investors understand the risks associated with those projects, and how to mitigate them. The presenter is energy risk expert, Christopher Lohmann , VP of Alternative Energy Solutions, Energi, Inc.

Large renewable energy projects require substantial capital investments, and depend on predictable, long-term cash flows in order to provide investor returns that can attract that capital, the institute says on its website.

The webinar addresses the questions of:

- What are the risks in renewable energy projects, and to which party can they be assigned?
- How can risks be managed, and at what cost?
- Which risks can be eliminated?

**Watch the on-demand webinar**.
