Meaningful Use vs. HIPAA

Compliancy Group will present a complimentary webinar discussing the difficulty of reaching full compliance with HIPAA.

The webinar will be Wednesday, Jan. 28, from 2-3:30 p.m. CST.

So you finally completed the implementation of your electronic health records (EHR), now you are HIPAA compliant, right? Sadly this is far from truth, says Compliancy Group on its website. “Meaningful Use” and HIPAA, though containing some of the same requirements (Core Measure 9 and 15), are far from the same. Learn in this webinar the differences in HITECH Meaningful Use and HIPAA and how to help your organization satisfy both.

The webinar panelist will be Bob Grant HIPAA auditor and CCO of Compliancy Group LLC.

Register for the webinar.
