The Critical Role of Contracts in Corporate Compliance Programs

Merrill DataSite is offering a complimentary evaluation tool that addresses the challenges faced in the ever-changing world of corporation compliance. This tool provide a process for evaluating compliance challenges and a method for considering solutions.

The process also helps readers learn more about specific compliance challenges, as well as this three-step program to determine a company's specific needs:

- Assess the current compliance challenges and impacts
- Review the existing program against a standard of best practices
- Create a comprehensive program that ensures effective compliance
