White Paper: Assessing Security in Contract Management Systems

Merrill DataSite for Contract Management has developed a complimentary white paper, “Assessing security in contract management systems.”

With security breaches making headlines, understanding potential vendors’ security programs and whether they align with your company’s specific requirements is an important step in the process of selecting a contract management solution.

The paper outlines the four steps to achieve alignment and screen vendors:

1. Identify the access needs of your company
2. Work with vendors to determine capabilities
3. Work with IT to assess vendor capabilities and determine alignment with your company’s needs
4. Meet with IT and selected vendors for a detailed review

Read the white paper.
