Mitratech and iManage Unite to Revolutionize Legal Tech

Mitratech and iManage have joined forces in a strategic move to transform legal operations. Together, they've launched an all-in-one platform that merges contract, case, and document management. The result is a single, seamless legal tech experience. This groundbreaking partnership embeds iManage Work directly into Mitratech's CaseCloud™. It marks the first fully unified digital environment designed specifically for legal teams in the corporate, public, and private sectors.

Unlike traditional third-party plug-ins, this integration is fully embedded, meaning users can work directly with iManage's robust content features inside CaseCloud without needing to switch platforms. This marriage of technologies marks a new milestone in legal tech, enabling law firms and legal departments to elevate collaboration, boost productivity, and maintain airtight compliance.

Key capabilities of the new platform include:

- Unified management of diverse legal documents, including contracts, memos, and legal filings.
- Streamlined contract workflows with built-in compliance and approval tracking.
- Enhanced document security and auditability backed by iManage's industry-leading infrastructure.
- Real-time visibility into legal processes through one centralized system.

Legal teams in both public and corporate sectors can benefit significantly from this platform. It reduces risk, speeds up legal processes, and ensures full oversight of every document's lifecycle. The integration combines Mitratech's automation tools with iManage's secure document environment. As a result, it streamlines litigation, contract handling, and

knowledge management like never before.

Chris Iconos, General Manager of Legal Solutions at Mitratech, emphasized the broader market shift:

“This is no longer a premium capability for elite firms – it’s a must-have for every legal and risk team striving to operate smarter and more securely.”

Dan Dosen, EVP of Channels and Alliances at iManage, highlighted the seamless user experience:

“By embedding iManage into CaseCloud™, we’re enabling legal professionals to manage critical knowledge where they already work. It’s about enhancing workflows without adding friction.”

The fully embedded iManage for Mitratech CaseCloud™ is now available to both existing and new CaseCloud™ clients. As legal technology continues to evolve, this partnership sets a new benchmark for unified legal platforms that combine reliability, usability, and innovation.
