Monetizing Large Judgments and Arbitration Awards

The Association of Corporate Counsel's Litigation Committee presents a free on-demand webinar on the international judgment enforcement and asset recovery process.

The event was sponsored by Kobre & Kim LLP.

On its website, ACC says the value of judgments and arbitration awards coming out of large-scale litigation continues to rise, so does the challenge of enforcing them. Sophisticated judgment debtors today often hold assets protected in a variety of structures in offshore financial centers around the world, which create challenging roadblocks to efficient and prompt recovery that can only be overcome with the right tools and strategies.

In this webcast, a group of internationally based attorneys, experienced in enforcing high value judgments and recovering hidden assets share their first-hand insights into the international judgment enforcement and asset recovery process. The panel discussion includes analysis of effective asset tracing, utilizing specific legal tools available in the U.S., Europe, Asia and offshore jurisdictions as well as the alternative fee structures available to minimize costs and risks.

Watch the on-demand webinar.
