

Are Your Board and C-Suite in Alignment on Cyber-Risk Strategy?

The National Association of Corporate Directors is offering a complimentary consultation to discuss a customized program for your board designed to help your organization's board collaborate with management in setting the company's cyber-risk strategy.

The program concludes with directors and executives agreeing on a clear set of cyber-risk priorities – along with milestones and responsibilities for making them happen.

The program is designed to help:

- provide the board with context around cyber risk
- lead constructive discussions with management
- produce a concrete roadmap for allocating resources to cyber-risk initiatives

Board and C-Suite Cyber-Risk Alignment is an in-boardroom customized program led by active directors with experience in the appropriate industry. It covers such topics as

- identifying vulnerabilities and ranking their importance
- determining which assets must be protected
- challenging flaws in the enterprise risk map
- understanding materiality and liability related to cyber risk
- defining appropriate cyber-risk and ERM indicators for your dashboard

Prospective participants may call 202-572-2081 or email Steve_Walker@NACDOnline.org.
