Oil and Gas Midyear Forecast and Review 2015

The Oil & Gas Journal will present its annual Midyear Forecast, a special report that uses first-half data to update projections that appeared in OGJ's Annual Forecast and Review this past January.

The webinar will be on Friday, July 10, at 10 a.m. Central time.

Both reports project oil and gas markets through the end of the year worldwide, analyze demand product by product in the United States, and forecast drilling activity in the United States and Canada. The webcast also will discuss political developments important to the oil and gas industry.

Presenters will be OGJ Editor Bob Tippee and Senior Economics Editor Conglin Xu. They will summarize projections in key categories, note important changes from January's forecasts, and examine reasons for the adjustments.

Register for the webinar.
