A New Approach to Enterprise Legal Management: A White Paper

Managing legal documents and transactions across an enterprise of any size is complex and challenging, but the systems supporting the effort don’t have to be, according to a statement from Onit. A new class of Enterprise Legal Management (ELM) solutions, designed for the way people and companies work, is changing the way legal departments manage matters, budgets and processes.

Download this white paper to learn more about why many legal departments are paying for features they don’t need inside products their lawyers don’t use. Find out how smarter technologies are bridging the gap between the promise and reality of ELM systems.

The white paper covers:

- Background on legal systems and the new technology curve
- Driving operational improvements with the right systems
- Using easy-to-use Apps to supplement the capabilities of a current ELM system with advanced automation
- Getting started with Apps to begin a legal operations improvement initiative
